All part numbers shown in blue are available through the STOCK LOCKS program.

Multi-Function Lock Line

The Concept of Multi-Function:

The concept of Multi-Function is to make one bag of components available to produce many different functioning locks (up to 6 different functions in our single bitted lock bag). This enables the locksmith to carry fewer locks in inventory while still having complete stock on hand. Multi-Function bagged cam locks include our patented Wonder Washer, which allows for installation into either wood or metal without the use of a double "D" punch.

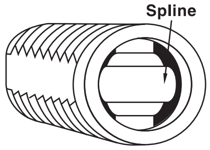

Multi-Function locks are available through several programs CompX Fort has developed. The STOCK LOCKS program provides 5 CompX Fort keyed alike and various keyed different codes, shipped in 24 hours of receipt of order. All other key codes (Key To Order - KTO) are available within CompX Fort Lock' s standard lead times.

The Multi-Function Line:

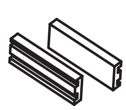

Many of our popular lock series are designed for Multi-Function usage.

- Single bitted cam lock
- Wood drawer or door lock
- Gem tubular cam lock
- Single bitted showcase lock
- Double bitted cam lock
- Double bitted showcase lock
- Gem tubular switch lock
- Metal desk drawer lock

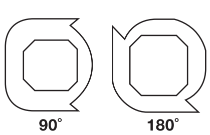

A typical Multi-Function product.

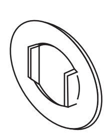

Shell With 4 Splines

2 Spline Fillers
To Insert In Splines As Required

Cam Stops

Wonder Washer

LOCK PROVIDED WITH PARTS FOR SIX DIFFERENT FUNCTIONS
